Hiring Manager

RE: Software Developer Application

Dear Hiring Manager,

I am a recent Computer Programming and Analysis (T177) graduate from George Brown College. With a solid 3.6 GPA and 1.5 years of experience in full-stack development, I am eager to join your company as a Software Developer.

My background includes developing industrial web applications at CENIBRA and architecting complex personal projects, such as a Java Spring Boot microservices ecosystem and a real-time Financial Dashboard. I have extensive hands-on experience with React, TypeScript and Node.js, focusing on clean architecture and system scalability.

I am particularly interested in your company because of your commitment to building high-impact products that solve real-world problems through innovative technology. My experience solving challenges like architecting scalable full-stack features and optimizing complex data flows directly aligns with the requirements of this role.

I am a collaborative and fast-learning person. Please reach out to me to schedule an intro meeting at your convenience. Thank you for your time and consideration.

Best regards,

Breno Lopes Mafra.
